

WestOne Cars Environmental Policy

As WestOne Passenger Cars is a leading provider of private hire passenger car services offering Corporate Cars, Executive Cars, WestOne Green, Events and Black Taxi services on a 24/7 basis, WestOne Cars recognises that its business activities, undertaken by both employees and drivers, have an environmental impact. We also recognise that we can make a contribution to protect, sustain and improve the environment. The Board of WestOne Cars is committed to minimising the environmental impact of WestOne Cars daily activities and will support and promote best environmental polices and practices wherever possible.

We will undertake the following activities in support of our policy:

- Comply with any relevant legislative and regulatory requirements by applying wherever possible the most appropriate actions.
- Continually review and monitor our business practices in terms of their environmental impact and make appropriate changes to support the reduction in wastage, energy utilisation and emissions.
- Encourage employees and couriers to recognise both the importance of environmental protection and how their activities and actions make an impact.
- Develop a culture of continuous improvement in the way we operate by placing an increased focus on the environment throughout our business and inviting suggestions from our employees and couriers of ways to improve.
- Make our Business Partners and Suppliers aware of our commitment and by so doing aim to encourage them to recognise and adopt their own environmentally supportive practises.
- Develop and implement a management system compliant with the requirements of ISO 14001:2004 - Environmental Management System (EMS) standard.
